PROFESSIONAL SUMMARY

IT and software professional with experience in website development, automation, IT support, health insurance (HMO) claims, and data and statistics. Currently self-employed, building websites, smart contracts, and automation tools for clients, and using modern AI tools to build and deliver working software quickly. A fast learner who is reliable, well organised, and able to adapt easily to different roles and work settings.

CORE COMPETENCIES

- Workflow Automation & Bot Development
- AI Tool Integration (LLM APIs, prompt engineering, AI-assisted pipelines)
- API Integration: connecting different apps and systems into unified workflows
- Smart Contract & Blockchain Automation (Solidity, NFTs)
- Full-Stack Development (JavaScript, Node.js, React)
- Rapid Prototyping & Fast Software Delivery
- Data Collection, Analysis & Reporting
- Technical Problem Solving & Debugging
- IT Support & Systems Troubleshooting
- Cross-Functional Communication & Teamwork
- Fast Learner: quick to adopt new tools and platforms

TECHNICAL SKILLS

Automation & AI: Workflow automation, custom bot building, and AI tool integration (used to design and deliver working software faster than manual development cycles).

Web & Software Development: Solidity, JavaScript, Node.js, React. Used to build websites, web apps, smart contracts, and NFTs, and to connect different apps and systems together.

Data & Office Tools: SPSS, Stata, Powersoft (HMO claims software), and Microsoft Office (Word, Excel, PowerPoint). Quick to learn new software platforms.

IT & Systems: Computer repair, hardware and software troubleshooting, and end-user support.

EXPERIENCE

Independent Developer (Self-Employed)

2022 – Present

Remote

- Build websites and web apps for clients, from start to finish.
- Write and launch smart contracts, including NFT smart contracts.

- Build automated systems that help businesses save time on routine work.
- Create bots and automation tools based on what each client needs.
- Use AI tools to build, fix, and deliver working software faster.

AI Educator (Freelance)

2026 – Present

Nerdroof (Remote)

- Taught AI workflows and how to use AI tools the right way.
- Created simple lessons and content covering everything related to AI.
- Helped learners understand and apply AI in their daily work.

Technical Researcher, Writer & Brand Ambassador

2022 – 2024

Eoracle Network (Remote)

- Researched blockchain topics and explained them in simple, clear writing.
- Wrote articles and guides that helped the community understand the project.
- Represented the project online as an ambassador, helping grow awareness.

Technical Researcher, Writer & Brand Ambassador (Freelance)

2024

Seedify (Remote)

- Researched Web3 and blockchain projects and broke down complex topics into clear, simple writing.
- Created articles and educational content to help the community understand the project.
- Worked as a brand ambassador, promoting the project across online communities.

NYSC, Research, Planning and Statistics (RPS) Department

2024

National Inland Waterways Authority (NIWA)

- Assisted with budgeting, planning, and policy work within the department.
- Supported monitoring and evaluation to track progress and performance.
- Collected and organised data and statistics to support research and decision-making.

IT & Claims Officer

2016 – 2020

Marina Medical Services (HMO), Lagos State

- Gave IT support and kept systems running smoothly each day.
- Collected, registered, and entered hospital claim bills into the claims system.
- Helped process health insurance claims accurately and on time.
- Kept records well organised, improving accuracy in the claims department.

Junior IT Instructor & IT Support Engineer

2015 – 2017

Cipiom IT School, Lagos State

- Taught basic IT to students in a simple, easy-to-follow way.
- Repaired and maintained computers as part of the IT team.
- Kept equipment working well to support smooth daily learning.

SELECTED PROJECTS

Skill Directory

Live: skill-directory.vercel.app

- A website that brings together the best resources for learning any skill, filtering out the noise so people can find quality materials fast.

Tools used: *Next.js, Tailwind CSS, Firebase*

Superteam Brazil

Live: superteam-rust.vercel.app

- The official online hub for the Solana community in Brazil, helping builders and creators get started on Solana.

Tools used: *Next.js, Solana*

8004 Arcade

Live: 8004-arcade.vercel.app

- A platform where AI agents check how well a player performs and approve on-chain token rewards based on skill.

Tools used: *Next.js, ERC-8004, AI evaluation*

CERTIFICATIONS & CONTINUOUS LEARNING

- AI certificates, including Anthropic's Claude.
- Self-taught in Web3 and blockchain development.
- Ongoing online learning in AI tools and automation.

ACADEMIC QUALIFICATIONS

Higher National Diploma (HND) in Statistics, The Federal Polytechnic, Ado-Ekiti	2022
National Diploma (ND) in Mathematics & Statistics, The Federal Polytechnic, Ado-Ekiti	2019
